I was born with a severe heart and lung defect and very narrow pulmonary arteries, which despite the efforts of doctors, tests, many treatments and operations in Poland could not be cured.

Every day my heart was getting more and more tired and my lungs were out of breath. Fortunately, I was able to find help in the USA. Dr. Frank Hanley of Stanford Children's Health decided to perform this complicated operation.

Thanks to the help of wonderful people, it has become **#cuddladawidka**.

TODAY I AM ASKING FOR THIS MIRACLE AGAIN.

I underwent surgery in September 2021 catheterizing my heart. It turned out that it had formed strictures in the pulmonary arteries and that it was necessary to widen them but tricuspid valve in my heart is not working correctly. In order for me to live and enjoy my childhood I need to undergo another heart surgery within a few months in the USA. Unfortunately, this is already the fourth open-heart surgery.

PLEASE SUPPORT MY FUNDRAISER AND HELP ME WIN THIS DIFFICULT FIGHT FOR MY LIFE!
